Artwork Submission

We can work from the original art (preferred), a professionally made transparency of the art, or a high quality digital file. The quality of the final print is directly related to the image we start from. When supplying original art we will scan this directly, giving us a first generation digital image to start with and giving you the highest quality on your prints.

When supplying a transparency a 4 x 5 is acceptable, but an 8 x 10 is best. Additionally, ask your photographer to supply you with a color print of the transparency. If the print is a good rendition of the colors in your original, send it along with your transparency. This helps us to know what the colors should look like.

Digital files should be 300 dpi at your print size. File format preferred is RGB or CMYK tif, jpg is acceptable. If you are working on your digital file with a color profile applied such as *Adobe 1998* or *Apple RGB* please embed the profile when you save your file, this helps us see what you see. If possible, send along a color proof and let us know if it is for content or color.

Proofing

A signed-off proof is required before we proceed with the final printing. The signed-off proof is used as a color standard for all other prints in the edition. *All signed-off proofs remain the property of Renaissance Imaging.*

Printing

We stock a 20-mil cotton blend matte finish canvas and six types of water-color media which are 100% cotton and acid free. We use pigment based archival inks to insure against fading.

Please Note: Minor cleanup of transparencies is included in our setup costs. If cleanup becomes excessive, we will contact you with an estimated cost.

Additional prepress time is billed at \$20.00 per quarter-hour.

Additional proofs are \$20 - \$30 each depending on media. Size is 8 x 10.

There is no setup charge if you supply a 300 dpi minimum, tiff format digital file ready for print.

PREMIUM PACKAGES

Our Premium Packages offers the closest reproduction to the original as possible. Each package includes: Digital image capture. Color correction for accurate color reproduction, editing and detail enhancement performed by our graphic specialist. Up to three proofing cycles, if needed, with the final proofs being half-sheet size and two copies, one will be kept by us as a sign-off and the other is for you. Storage of final digital image for future print orders. Certificate of Authenticity and/or Limited Edition Certificate, and a CD with digital images of your job for your web site.
